Experience

Front-End Developer-intern

Mar. 2024

At :<https://www.linkedin.com/company/routeacademy>

- **Bootstrap:** Developed mobile-first responsive websites, boosting mobile traffic by 30% and reducing bounce rates by 20%.
- **JavaScript:** Built dynamic, interactive web apps.
- **AJAX:** Improved user experience with asynchronous data loading.
- **CSS:** Crafted visually appealing, user-friendly pages.
- **jQuery:** Simplified DOM manipulation and event handling.
- **HTML5:** Structured modern, efficient web applications.
- **Tailwind CSS:** Designed custom, responsive interfaces with utility-first CSS.
- **Responsive Web Design:** Optimized websites for all screen sizes.
- **Git:** Managed version control and collaborated effectively on projects.
- **Angular:** Developed and maintained scalable web applications.

Projects

Customer-Transactions:

Jul 2024

<https://github.com/sayedmohameddev/Customer-Transactions.git>

Developed a responsive web application frontend to manage and visualize customer transaction data, featuring an interactive customer data table and detailed transaction views with dynamic charts.

Yummy:

Jul2024

<https://github.com/sayedmohameddev/YummyExam.git>

Developed a responsive web application for browsing and discovering recipes. The application provides users with an intuitive interface to explore various dishes, view detailed recipes, and filter search results based on different criteria.

Game:

Jun 2024

<https://github.com/sayedmohameddev/game.git>

Game Project This project is a web-based game designed to provide an engaging and entertaining experience for players of all ages.

Fake Store:

Aug 2024

<https://github.com/sayedmohameddev/fakeStore.git>

Fake Store is a modern e-commerce web application that simulates a fully functional online store. The project allows users to browse products, view detailed descriptions, add items to a shopping cart, and manage their orders. It's designed with a clean and responsive interface, providing an engaging user experience across all devices.

FreshCart:

Sept 2024

<https://github.com/sayedmohameddev/freshcart--ECO.git>

A full e-commerce web application developed for the Route Academy Front-End track using Angular. The project's state management was implemented using NgRx to fully leverage its capabilities.

Amazon:

Oct 2024

<https://github.com/sayedmohameddev/amazon.git>

Developed a full-featured e-commerce web application with Angular, implementing dynamic state management using NgRx and a fully responsive design.
